

Solution Requirements

Date	02 October 2026
Team ID	6ab4fee46603573ccfb61108
Project Name	ComicCraft
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	User Input	Accept story prompt, character, setting, tone and art style.	High
2	Story Generation	Generate structured five-panel outline.	High
3	Narration & Dialogue	Generate narration and character dialogue.	High

8	Integration	Coordinate Gemini and Stable Diffusion through FastAPI.	High
9	Error Handling	Handle invalid input, API, image and PDF failures.	High
10	File Export	Store generated panel images and exports.	Medium
11	Environment	Run in Python/FastAPI environment.	Medium
12	Security	Store API keys using environment variables.	High
13	Documentation	Provide README and setup/run instructions for the evaluator.	Medium

Step 2: Non-Functional Requirements (NFR)

Step 2: Non-Functional Requirements (NFR)	The system quality requirements are documented on the next page.	Requirement Description	Target Metric / Acceptance Criteria
---	--	--------------------------------	--

1	Performance	AI requests should be processed efficiently.	To be measured
2	Scalability	Architecture should allow future improvements.	Supported by modular design
3	Security	API credentials stored in environment variables.	Required
4	Usability	Interface should be simple and understandable.	Required
5	Reliability	Errors should be handled without crashing.	Required
6	Maintainability	Use modular Python files.	Required
