Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	Not specified in supplied project documentation.
Programming Language(s)	Python
Framework(s) Used	FastAPI, Jinja2
Key Features Implemented	Five-panel story generation, narration/dialogue, Stable Diffusion images, preview, PDF export, JSON/API routes.
Pending / Incomplete Features	Windows .exe packaging and further enhancements are not documented as completed.
Setup / Run Instructions	Create environment, configure API keys, install dependencies, run: <code>uvicorn app.main:app --reload</code> ; open <code>http://127.0.0.1:8000</code> .

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Partial
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Not specified

The supplied documentation describes the implemented workflow and testing objectives. Repository URL and commit evidence are provided in the source material.

Additional Notes / Comments:
