

Scalability & Future Plan

Date	02 October 2026
Team ID	6ab4fee46603573ccfb61108
Project Name	ComicCraft
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	AI generation latency	Longer response time during generation	Medium
2	Local deployment	Limited by local machine resources	Medium
3	API dependency	External AI service availability affects generation	High

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Local single-user workflow	Deploy behind scalable API service and queue generation jobs
2	Data Storage	Static files for panels/PDFs	Use object storage and a managed database if user libraries are added
3	Performance	Sequential AI/image generation	Use caching, asynchronous processing and batching where appropriate
4	Security	API keys in environment variables	Use secret management and access controls for production

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
-------	-------------------------------	-----------------	-----------------

Phase 2	User profiles and saved comic library	Future phase	Persistent user experience
Phase 3	Multi-page story arcs	Future phase	Longer stories
Phase 4	Cloud deployment and scalable generation	Future phase	Larger user base
